SAMPLE REPORT

Sample ZYTO Balance Scan Wellness Report

Godo Chiropractic - Lakeview Chicago

What this sample is
A simplified educational preview showing several chart styles and report sections from a ZYTO Balance Scan using test data.

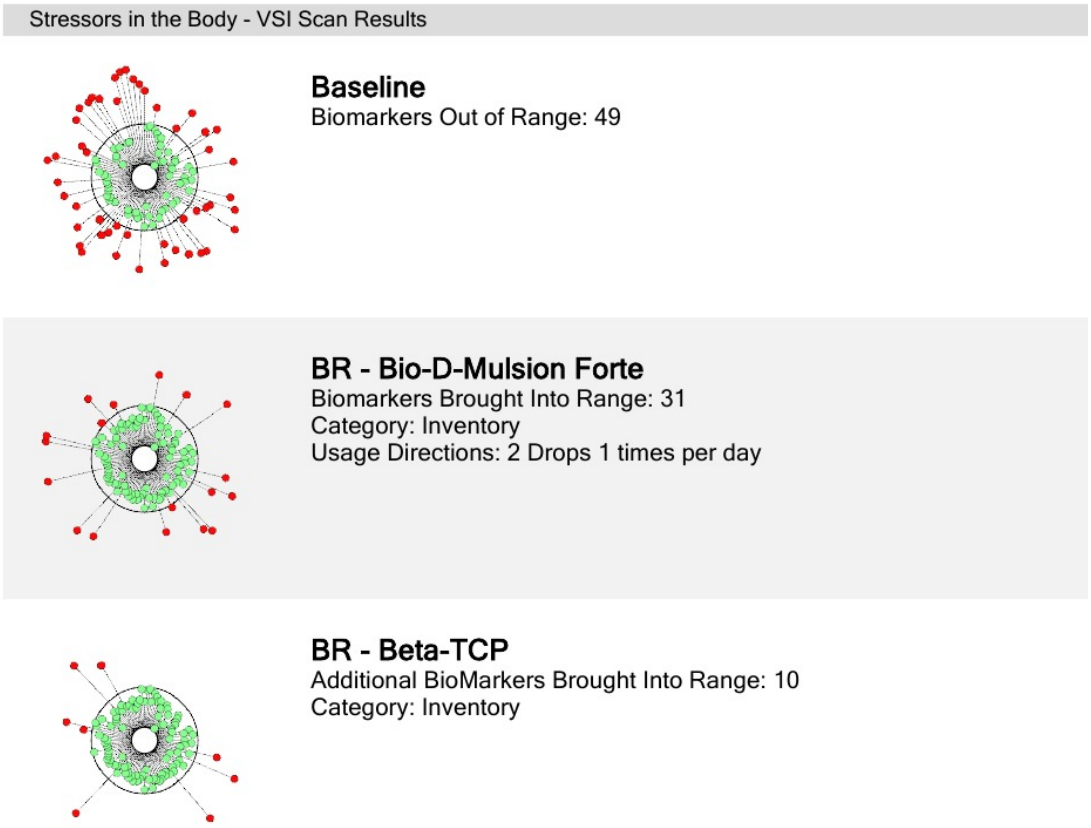
Important: ZYTO records galvanic skin response while software presents wellness-related Virtual Items. The resulting charts organize response patterns. They do not diagnose disease, measure organ health, determine vitamin or hormone levels, or replace laboratory testing or medical evaluation.

This sample uses test data and is intended only to show the general appearance and organization of a ZYTO wellness report.

1. How to Read a ZYTO Report

During a scan, the ZYTO Hand Cradle records changes in galvanic skin response while the software presents digital references known as Virtual Items. ZYTO then organizes those responses into visual reports for practitioner review.

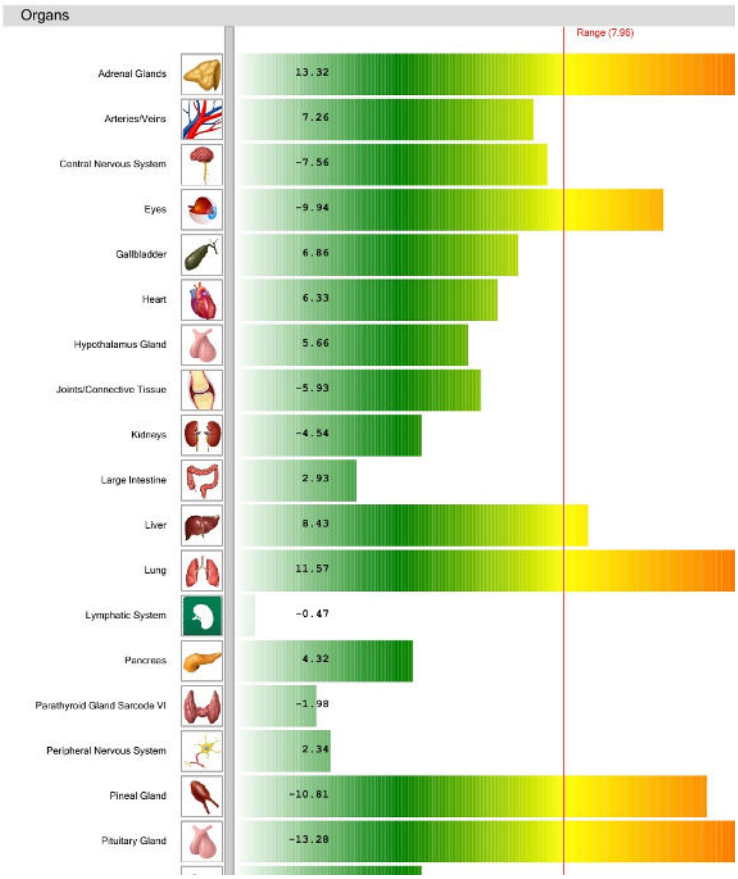
Example: Response Pattern / VSI Results



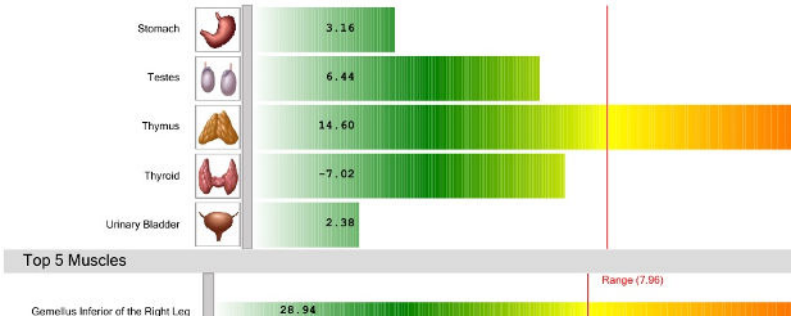
In this example, the software establishes a baseline and then displays response patterns associated with selected library items. The displayed product or category information is part of the software library and should not be interpreted as a diagnosis or laboratory finding.

2. Wellness-Category Response Charts

This ZYTO Balance Scan report organizes responses into category-based charts. Some report labels may reference organs, body systems, muscles, vertebrae, teeth, products, or other library categories. These labels identify Virtual Item categories within the software; they are not direct measurements of those structures.



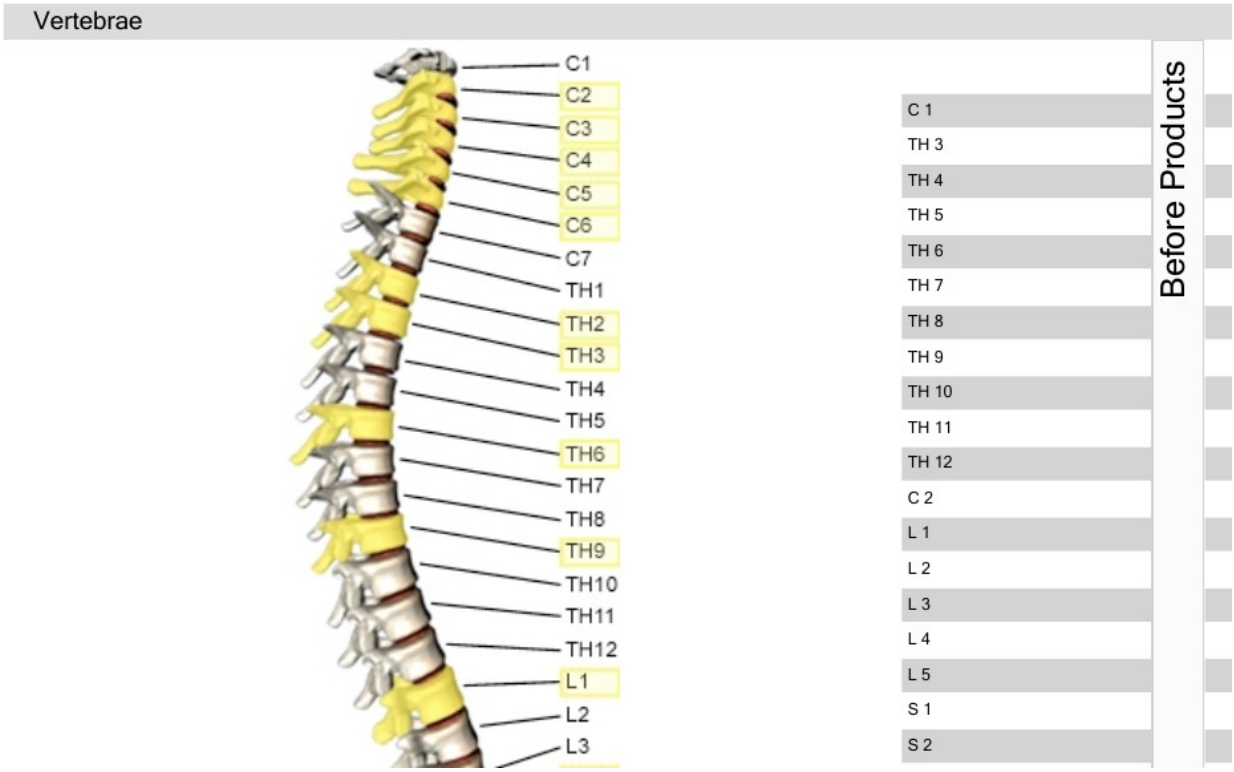
Example: category chart labeled “Organs.” The bar lengths reflect response data relative to the software-defined range; they do not indicate organ function or disease.



Example: “Top 5 Muscles” category display. The names are software library labels associated with GSR response patterns.

3. Vertebral Virtual Item Categories

This ZYTO Balance Scan report displays response patterns associated with vertebral Virtual Items. This type of chart may be useful as an organizational aid during a wellness discussion, particularly in a chiropractic office, but it does not constitute spinal imaging or a structural diagnosis.



This example shows how the report can visually organize vertebral categories and corresponding response values. Chiropractic examination findings, imaging, or other clinical testing remain separate from ZYTO results.

4. Progress and Comparison Views

Some ZYTO reports compare response patterns across a sequence of Virtual Items or across follow-up sessions. These tables can make it easier to review how software-organized response patterns change over time.

Biomarker Progress Chart

	Baseline	(49)	BR - Bio-D-Mulsion Forte	(18)	BR - Beta-TCP	(8)	BR - Optimal EFAs Caps	(5)	BR - Bio-Ae-Mulsion Forte	(1)
C 2		18.47		-19.59		-8.80		-11.40		17.7
C 6		14.59		8.87		-13.29		-18.01		
T 02 / 7+		17.07		-15.02		-20.59		11.06		
T 27 / 3-		-16.08		-18.18		-19.33		11.05		
L 1		14.95		19.89		-11.67		-8.01		
C 3		-16.37		-12.13		-21.25				
TCM - Gall Bladder Meridian		-10.05		16.74		17.92				
TCM - Liver Meridian		13.85		-12.46		10.52				
TH 6		12.25		18.88						
Pituitary Gland		-13.28		-18.57						
T 01 / 8+		8.34		18.47						
T 24 / -1		9.30		15.47						
Eyes		-9.94		12.91						
Liver		8.43		-10.93						
T 09 / +1		9.78		10.92						
TCM - Urinary Bladder Meridian		9.66		-10.67						
S 4		-14.01		8.21						
T 05 / 4+		-14.03		-8.20						
Gemellus Inferior of the Right Leg		28.94								
Adductor Pollicis of the Right Hand		27.36								
TCM - Triple Warmer Meridian		22.73								
Abductor Digiti Minimi of the Right Foot		22.49								
Right Obliquus Capitis Superior		18.60								
T 26 / 2-		-17.73								
TCM - Large Intestine Meridian		17.10								
C 5		-16.72								
T 03 / 6+		-16.23								
C 4		15.82								
Styloglossus		15.69								
T 15 / +7		-15.32								
Thymus		14.60								
T 10 / +2		-13.77								
TH 9		-13.45								
Adrenal Glands		13.32								
T 20 / -5		-12.46								
T 30 / 6-		12.46								
TH 2		11.89								
Lung		11.57								
T 07 / 2+		-11.50								
Pineal Gland		-10.81								

Example: biomarker progress chart. In ZYTO terminology, “biomarker” here refers to a software response item, not a laboratory biomarker such as a blood test result.

5. Understanding This Balance Scan Sample

This sample was created from a ZYTO Balance Scan using test data. Balance Scan reports can organize response patterns into visual categories for wellness-focused review. At Godo Chiropractic, the ZYTO Pro Scan is a separate, more comprehensive service performed using the ZYTO Elite platform, so a Pro Scan report may differ from the Balance Scan example shown here.

A Balance Scan report may include:

• Baseline and response-pattern displays

• Wellness-related Virtual Item categories

• Muscle- and vertebral-category displays

• Product or nutritional library comparisons, when selected

• Progress or comparison charts

• Follow-up discussion when doctor review is selected

Regulatory and clinical limitations

The ZYTO Hand Cradle has been cleared by the FDA for measurement of galvanic skin response. ZYTO software has not undergone FDA review for effectiveness. ZYTO technologies are not intended to diagnose, cure, treat, mitigate, or prevent any disease or medical condition. Diagnosis and treatment of medical conditions should be undertaken by qualified medical professionals.

ZYTO professional software provides general wellness information. ZYTO products have not been the subject of controlled clinical trials establishing effectiveness and are not generally accepted medical practice by the traditional medical establishment.
